COMPILATION  
OF  
COUNTY COMMITTEE RECOMMENDATIONS  
1940 FARM PROGRAM

-----  
North Central Region

KEY TO 1940 PROGRAM SUGGESTIONS

- A - GENERAL
- B - WHEAT PROGRAM
- C - COMMODITY LOANS
- D - CROP INSURANCE
- E - COUNTY ORGANIZATION
- F - STATE AND COUNTY ALLOTMENTS
- G - FARM DEFINITION COMBINATIONS
- H - FARM ALLOTMENT PROCEDURE
- I - CLASSIFICATION OF CROPS - RATES
- J - SOIL BUILDING PRACTICES - RATES
- K - PERFORMANCE AND APPLICATIONS FOR PAYMENTS
- L - FIELD ORGANIZATION
- M - EDUCATION
- N - RANGE PROGRAM

SUGGESTIONS	NUMBER OF COUNTIES
GROUP A --- GENERAL	
Increase soil building allowance	124
Continue present program with but few changes for 1940	109
Make no price adjustment payments or loans when other special allotments materially exceeded	36
Increase general soil depleting payment	29
Remove limitation on amount of payments	27
Make dairy products a special commodity	27
Establish minimum payment per farm	24
Make closing dates late as possible then don't change	19
Restore 80% rule	14
Simplify rules, regulations and forms	13
Make less changes in procedure and rulings	12
Give more consideration to small farmers	6
Continue use of farm plan form	6
Make payments on basis nondepleting rather than depleting acreage	5
Make corn and wheat allotments interchangeable	4
Establish commercial vegetable allotments with \$10 an acre allowance	4
Remove \$10,000 payment limitation from landlords but not large operators	4
Eliminate range land in determination of commercial corn area	3
Provide processing taxes for financing program	3
Make each county responsible for all land in the county	3
Wheat and corn combined for performance	2
Reduce red tape	2

Require woodlot participants to be cooperators in AC program	2
Increase minimum crop acreage for eligibility from 3 to 10 Acres	2
Make impartial study by college and experiment stations to determine effect of AC program in North Central Region	2
Permit all farms to elect nonallotment option	2
Start program one month earlier	1
Retire submarginal land	1
Maintain prices rather than payments	1
If special allotments total less than 15 acres combine for performance	1
Change \$10,000 limit to county basis	1
Simplify small farm procedure	1
Make photostatic copies easier to read	1
Develop programs on basis of smaller sections of the country	1
Combine all payments	1
Require greater reduction of depleting crops	1
Place marketing quotas on acreage basis	1
Eliminate all farms with less than \$150 income	1
Continue price adjustment payments	1
Amend price adjustment act to read: "When price reaches parity" rather than "75% of parity"	1
Allow up to 20 acres corn to be planted by all farmers without penalty	1
Eliminate correction of errors of less than 2%	1
Eliminate all special allotments except cotton	1
Provide special allotment for rye	1
Make payments on basis of acreage of crop land	1
Increase Burley tobacco payment	1

Maintain master AAA record in State office for every farm	1
Discontinue price adjustment payments and add to conservation payments	1
Include examples with instructions	1
Provide more payments to tobacco and less to general	1
Increase parity payments	1
Permit tobacco growers to sell all produced on allotted acres without penalty from marketing quotas	1
Expedite handling claims in State office	1
Give States authority to adjust county allotments	1
Outline county work at least 6 months in advance	1
Treat vegetables A special crop	1
Continue commercial orchard allowance at \$2.00 an acre	1
Use 80% provision when supply is below normal or vice versa	1
Require participants to plant one tree for every \$100 payment	1
Use agricultural appropriations for cash renting land by government	1
Require rotation of soil conserving acreage unless put in permanent pasture	1
Continue marketing agreements on potatoes	1
Use 203's in establishing ACP yields	1
Remove limitation on payments when owner leases farm on shares	1
Require all fallow operations to be completed within 30 days after first operation is completed	1
Increase corn payments	1
Increase corn payments to small farms	1
Eliminate all farms of less than 10 acres	1
Simplify and decentralize administration of program and give producers and county committees greater part in developing program	1

Eliminate all unnecessary administrative expenses	1
Either remove \$10,000 limitation for landlord or permit tenant to receive 100% of payment	1
Give 3 percent tolerance for exceeding special crop allotments	1
Provide cost of production for AAA cooperators	1
Eliminate farms whose payments are less than administrative costs	1
Have more experimental counties	1
Further extend research work to find new uses for farm products	1
Do not list government or X land	1
List farms alphabetically	1
Classify part on non-crop open pasture as nondepleting cropland	1
Do not list farms with no cropland	1
Rules should be in conformity to good farming practice	1
Make barley a special crop	1
Give State committee most authority in formulating program	1
Give county rules in ample time for carrying on program	1
Simplify or eliminate price adjustment payments	1
Require full compliance with all allotments before making any payments	1
Establish productivity on basis of larger area than county	1
Do not penalize a farmer if out of compliance for reasons beyond his control	1
Designate non commercial tobacco counties	1
Make program changes at earlier dates	1

GROUP B -- WHEAT PROGRAM

Establish commercial wheat area	10
Place wheat entirely on seeded basis	9

Eliminate wheat allotment under 5 acres	7
Classify wheat for pasture non depleting	7
Classify wheat mixtures as wheat	5
Classify wheat as cover crop non depleting	4
Classify spring small grains and wheat mixtures as general crop	3
Place wheat on allotment farms on seeded basis	2
Change date for clipping wheat from May 20 to June 10	1
Provide higher penalty for exceeding wheat allotment	1
Get wheat allotments out early	1
Place wheat on harvested basis	1
Classify overseeded spring wheat same as winter wheat	1
Classify wheat as general crop in minor wheat counties	1
Do 1940 and 1941 wheat listing at same time so as to get 1941 out on time	1
Do not use less than two years history in setting wheat allotments	1

GROUP C -- COMMODITY LOANS

Change definition of commercial corn area. Make uniform loan rates between commercial and non commercial area	4
Provide commodity loans on oats and barley	3
Continue commodity loans	2
Provide higher wheat loans	2
Destroy all noxious weeds in grain samples before turning samples over to wild life authorities	1
Establish corn loans maturity date not earlier than September 10	1
Liquidate all corn loans through State set-up	1
Provide for centralized federal licensed elevator for storing loan grain	1
Discontinue or more closely supervise shelled corn loans	1

Make loans on barley and rye	1
Do not sell sealed corn for less than sealing price	1
Partly finance additional farm storage	1
Provide more equitable cash settlement of commodity loans	1
Make loans on all grades of wheat at least as high as corn value	1
Compute settlement figures in county office	1

GROUP D --- CROP INSURANCE

Establish loss yields and loss cost on basis of soil types and productivity	6
Appraise yields and loss costs for crop insurance	6
Provide crop insurance for corn	5
Use individual yields but uniform township basis for determining loss costs for crop insurance	4
Simplify crop insurance	2
Do not require same yields for crop insurance as for ACP	2
Provide full coverage for normal yield for crop insurance	1
Do not establish crop insurance yields on basis of present records	1
Lower crop insurance premium rates	1
Use key farm procedure only for establishing loss costs	1
Make crop insurance compulsory for all participants in ACP	1
Provide more uniform loss cost for crop insurance	1
Provide no crop insurance on volunteer wheat	1
Make adjustments to take care of crop insurance yields on good clean summer tillage for counties outside of summer fallow area	1
Do not insure wheat which has not been seeded in manner approved by community and county committee	1
Provide lower loss cost on fallow than on stubble ground	1

Use larger area than county in setting loss cost	1
Extend crop insurance to corn, barley and rye	1
Use 25 year period in computing crop insurance yields and losses	1
Use 203's in establishing crop insurance yields	1
Do not accept applications until seeding completed and correct acreage determined	1
Hold public meetings to explain desirability of crop insurance	1

GROUP E -- COUNTY ORGANIZATION

Keep administration of all farm programs in hands of actual farmers	25
Provide longer than one year terms for farmers for county offices	12
Compute county expense deduct rate on basis of maximum payments	8
Allow only participators vote in county elections	4
Charge portion administrative expense to price adjustment program	3
Confine selection of county delegates to AAA committeemen	2
Eliminate delegates to county organization meetings	2
Provide three year terms for county committee	1
Provide committeemen take office January 1	1
Require county committeemen must have been either community or county committeeman previous year	1
Make it optional for county agent to serve as secretary	1
Divide townships into three districts with committeemen from each district and two at large	1
Give community committeemen mileage to county office	1
Audit county books each year	1
Give county committee higher rate pay than township committee	1
Pay mileage for attendance of meetings by community committees	1
Give local committeemen more authority in administering program	1

- Have State committee or Regional Director appoint county committee 1
- Appoint a county administrator to supervise program in counties 1

#### GROUP F -- STATE & COUNTY ALLOTMENTS

- Provide larger county allotments 4
- Increase county allotments for newly cleared land 3
- In establishing county allotments give consideration to previous reduction in county acreages 2
- Increase small grain allotments for less productive counties 1
- Set county allotments on basis county planning committee recommendations 1
- Establish county allotments on basis of crop acres 1
- Recheck State and county allotments, yield and productivity factors 1
- Accept breaking out new land as reason for increasing soil depleting allotment 1
- Restore to counties 1938 Burley tobacco acreages 1
- Lower restoration goals 1
- Provide more uniform county productivity across State lines 1
- Do not penalize drought areas when establishing county allotments 1
- Increase county wheat yield 1
- Do not reduce corn or total soil depleting allotments 1
- Permit shifting of portion of one special allotment to another special allotment 1

#### GROUP G -- FARM DEFINITION COMBINATIONS

- Same combination of farms for 1940 as 1939 combinations (Permit committee to discourage) 13
- Eliminate combination of farms 9
- Determine performance on basis of all land in farming unit 3

Compute payments on each farm without regard to performance on other farms	3
Permit joint compliance without changing allotments	2
Allow less combinations and splits	1
Simplify definition of farm	1
Make national vegetable allotments or abandon same	1
Furnish completed John Doe sample forms	1
Do not list farm with less than six acres of cropland	1
Finance programs with processing taxes	1
Eliminate \$10,000 limitation for landlords who lease their separate farms to tenants	1
Require farmers participating only in price adjustment or loan programs to contribute to county expense.	1
Start listing sheet work early and have them approved by State committee before notifying farmers	1
Give out complete instructions at beginning of year including county office schedule	1
Make smaller corn payments	1
Permit no combinations after June 1	1
Retain 1939 idle farm definition	1

GROUP H --- FARM ALLOTMENT PROCEDURE

Give local committee more authority in adjusting allotments	30
Increase non allotment special limits	19
Continue non allotment provisions	19
Use 1939 allotments except for revisions of small percent of cases by committee	13
Give greater weight to 203 and less to history	12
Increase soil depleting allotment 1/4 acre for each acre in contour strip farming.	11

Don't allow non participant to have advantage over participant because of high history	9
Give less weight to history in setting farm allotments	8
Include non-crop pasture in establishing allotments	7
Use crop land ratio for establishing allotments	7
Correct 203's	6
Dispose of or correct 203's	5
Do not deduct sugar beet acreage from total allotment	4
Use 1937-38-39 history in setting allotments	4
Give history substantial weight in setting allotments	3 1/3
Give greater weight to soil types in setting allotments	3
Scale 1939 allotments to meet 1940 county limits	3
Establish allotments entirely on basis of good farming practice	3
Use county cropland ratio and present productivity in setting allotments	2
Use either county or township ratio in adjusting history	2
Give more weight to productivity where history abnormal	2
Use three year average history and 203's	2
Set allotments on idle farms more in line with farming operations	2
Base allotments on history, 203 and crop land ratio	2
Establish corn and general allotments at time wheat allotments are set	2
Use 203's only for establishing yields	2
Use same period for establishing history for all crops	2
Provide special allotments for peat soil	1
Permit each county select its own allotment procedure	1
Use three factors for setting allotments A. History - B. 1939 Allotment - C. 203	1

Use 1939 substitute history instead original history	1
If given new wheat allotment decrease corn allotment	1
Give county committee the authority to increase total allotment to twice corn allotment	1
Eliminate special allotments for small tracts	1
Consider improved woodlots as crop land	1
Give more consideration to request for special allotments where history not available	1
Set soil depleting allotment on every farm at least as large as 30 to 50% of crop land	1
Increase small cotton allotments	1
Establish allotments by October 1	1
Decrease allotments where 1939 allotment not entirely used	1
Round allotments to whole numbers in expressing acres	1
Adjust proportionate shares for sugar beets	1
Use longer period in determining crop history for farm	1
Require that every 160 acres have 10 acres of pasture which should be classified as non cropland	1
Establish total allotments same as corn and wheat in 1939	1
Do not permit new cotton and wheat farms to get as large acreage as regular farms	1
Permit county committees to distribute "frozen" acreage	1
Permit county committee to pool unused allotments	1
Do not use NCR-203 in establishing wheat allotments	1
Abandon history entirely and use NCR-203 goal	1
Obtain more complete history information	1
Divide split farm allotments on basis of cropland	1
Round allotments to one-half acres	1
Make all farms of 20 acres or less of cropland non allotment farms	1

Use usual corn history if NCR-203 corn acreage is greater than usual	1
Decrease non wheat allotment acreage to six acres	1
Eliminate judgment in determining allotments	1
Do not give credit to "Y" land in setting allotments but make payments for keeping such land in grass	1
Do not require written reasons for departing from allotment procedure	1
Grant county committee authority to set aside a floating allotment for farms not regularly operated	1

GROUP I --- CLASSIFICATION OF CROPS - RATES

Continue flax as non depleting crop	10
Classify soy beans for all uses non depleting	8
Classify grain hay as non depleting	7
Classify forage sorghums for silage as non depleting	6
Control weeds on idle land	5
Restrict wind erosion and restoration land area to light, sandy soil, make restoration land optional at request of operators	4
Extend fallow date to July 1	3
Classify small grain hay as depleting	2
Reduce number of reports	2
Classify grain sorghums as non depleting	2
Discourage double cropping of land	2
Clarify cropland definition and discontinue changing it	2
Use diverted acreage only for soil building	1
Classify tomatoes non depleting	1
Determine whether orchards depleting or non depleting at time of inspection	1
Provide special allotments for beans	1

Classify asparagus as fruit	1
Retire diverted acres entirely from production	1
Classify oat hay non depleting even though not used as nurse crop	1
Eliminate special allotments for potatoes	1
Classify rye hay non depleting	1
Provide reclassification of restoration land	1
Liberalize definition of idle land and wind erosion area	1
Classify Cheyenne stalk same as Atlas sargo	1
Classify restoration land as range land	1
Classify turn rows and small unused portions of fields as soil depleting if infested with noxious weeds	1
Classify small grains for pasture non depleting	1
Permit only part of conserving acreage to be in sorghums	1
Do not change crop classifications	1
Classify soybean hay non depleting	1
Classify rye for hay non depleting on soils subject to wind erosion	1
Put all crops on seeded basis	1
Classify thistle control areas as non depleting	1
Establish rates for fallow on basis of smaller areas	1
Classify truck crops for home use as non depleting	1
Classify idle land as depleting	1
Classify part of sugar beet acreage as non depleting	1
Give special consideration to farms growing peppermint	1
Designate small grain hay on intention sheet	1
Continue 1939 crop classification	1
Classify all oats used as nurse crop non depleting and soy beans for all purposes depleting	1

Classify oats for hay non depleting when followed by lespedeza even though lespedeza is turned under before November 1 for soil building purposes	1
Do not classify corn or wheat as such if destroyed before grain formation	1
Classify oats for grain as non depleting if good stand of grass on legume attained. Do not require good stand if oats is used for pasture.	1
Classify fodder corn planted after June 15 as non depleting	1
Extend fallow date to July 10	1
Classify oats cut with binder but not tied in bundles as oat hay	1
Do not classify as cropland only land which cannot be farmed every year	1
Permit substitution if idle land for fallow where it is good land use	1
Classify rye as special crop	1
Do not classify corn and sorghum mixture used for silage as corn if corn is less than half of mixture	1

GROUP J --- SOIL BUILDING PRACTICES - RATES

Make clipping sod in orchards soil building practice	18
Make plowing under soy beans soil building practice	18
Provide flat allowance per acre for non crop pasture to be earned by pasture treatment only	13
Continue superphosphate as grant of aid, and add lime	12
Increase limestone credit	12
Make one ton mulch material equal one unit	11
Provide alfalfa mixtures be given same credit as straight alfalfa seeding	11
Make control of noxious weeds soil building practice	10
Place more emphasis on shelter belt practices	9
Make green manure crops soil building practice on all land	9

Increase penalty for not earning soil building allowance	5
Increase credit for all soil building practices	5
Eradication of bindweed soil building practice	5
Make summer fallow soil building practice	6
Make payments for plowing under rye, cow peas & sweet clover	4
Decrease credit for seeding lespedeza	4
Increase forestry practice credits	4
Give payment for winter cover crops	3
Make rye as cover crop soil building practice	3
Make incorporation of all crops in orchards soil building practice	3
Set aside special woodlot allowance	3
Require earning at least 25% soil building allowance by liming	2
Make gulley control soil building practice	2
Make no payment unless soil building allowance earned	2
Give orchard man more ways of earning soil building allowance	2
Cut seeding payments 50%	2
Provide woodlot participants must sign agreement to protect woodlots for 5 years.	2
Set aside not more than 25% of total acreage in any one farm as permanent woodlot - payment \$1.00 acre first years maintenance of 50¢ year thereafter	2
Provide windbreak practice limit 4 acres any one farm: Payment \$10.00 acre first year, \$2.00 maintenance thereafter	2
Make practice payments for stripping idle land in wind erosion area	2
Give credits for practices more in line with actual cost	2
Do not make payments unless farmer performs a minimum of soil building and erosion preventing practices	2
Make more payments for erosion prevention	2
Provide more flexibility for earning soil building allowance	1

Continue grants of aid	1
Make payments for use of timber land according to good forestry practice	1
Give credit for applying superphosphate to legumes seeded in small grains	1
Make payments for improving pastures and reforestation regardless of other performances	1
Make tile drainage soil building practice	1
Make plowing under grass hay soil building practice	1
Furnish trees in lieu of soil building payments	1
Make winter cover crops soil building practice on all land	1
Give credit for limestone on basis cost at farm	1
Provide minimum payment for soil building practice on all farms	1
Increase credit for terracing, contour planting, pasture furrows	1
Make no deductions from soil building allowance for exceeding depleting allotments	1
Give credit for fertilizer when used with small grains seeded to legumes	1
Make application of calcium cyanid soil building practice	1
Make 1400# No. 2 limestone equal one unit	1
Provide payments for plowing under sown corn	1
Increase allowance for commercial orchards	1
Increase payment for resting non crop open pasture	1
Do not limit amount to be earned by seeding permanent pastures	1
Make definite payment for seeding legumes especially on irrigated land	1
Increase credit for seeding approved grass mixtures in wind erosion area	1
Increase restoration land payments	1
Make payment for seedings of legumes and grasses without limitation of soil building allowance	1

Make application of stockyard manure on orchards a soil building practice	1
Increase pay for soil building practices of more permanent nature	1
Consider soil building practices after August 1 as part of next year's performance	1
Make building and maintenance of dams for surface water a soil building practice	1
Make forestry practice on non cropland a soil building practice	1
Increase payments for seeding perennial grasses and legumes	1
Give credit for planting trees and clover on restoration land	1
Make cover crops following plowed under soybeans a soil building practice	1
Increase soil building allowance on low fertility farms	1
Give credit for sweet clover as cover crop in orchards	1
Either make more payments for seeding legumes alone or less for seeding with grain crops	1
Provide for testing soils for acidity	1
Flowing or cultivation this fall for grasshopper control	1
Require only 3 acres for summer fallow to equal one unit	1
Require only 150 trees per acre in wind erosion area	1
Continue 1939 soil building rates	1
Allow 3 years allowance to accumulate for such purposes as large dam	1
Set aside special fund for reforestation practices	1
Increase payments for seeding down restoration land	1
Do not make payments for tillage practices for grasshopper control	1
Permit unused soil building allowance to be taken by those who earned all of theirs	1
Give credit for liming on basis of cost at quarry	1

Decrease soil building payments for routine practices such as seeding and increase for non routine such as liming	1
Require better cultural practices in seeding old pastures	1
Increase credit for phosphate applications	1
Decrease credit for seeding timothy and red top	1
Classify oat hay not used as nurse crop and sweet sorghums as non depleting	1
Designate quack grass as a noxious weed	1
Pay \$25.00 per acre for chemical bind weed eradication	1
Allot each county its share of soil building payments and do not decrease amount earned by each farmer unless county allotment exceeds in which case factor all to county allotment	1
Pay \$1.50 per acre for seeding rye as a go-down crop on light soil	1
Increase red clover seeding credit	1
Make payments for woodlot maintenance	
Increase allowance based on non-crop open pasture	1
Make payments for old stands conserving crops	1
Make soil building payments for only practices carried out above an allotment of practices established for each farm	1
Make practice payments for application of mulching material to potato land	1
Make plowing under of all legumes a soil building practice	1
Make 25% of total payment for conservation practices	1
Give soil building payments to person making contribution to soil building practices	1
Make clearing of land soil building payment	1
Make control of insects soil building practice	1
Continue practice payments for wind and water erosion control	1
Make woodlot payments regardless of exceeding other allotments	1
Continue 1939 woodlot practice payments in 1940	1

GROUP K -- PERFORMANCE AND APPLICATIONS FOR PAYMENTS

Give landlord 100% payments on field-rented farms	11
Make payments earlier	3
Prevent landlords from obtaining undue share of payments through changed leases	3
Provide no closing date for executing farm plan and for checking performance	2
Permit assignments for seeds and fertilizer	1
Measure all split fields and new fields before planting	1
Eliminate certification of man and wife and make it responsibility of county office	1
Advance money in spring for purchase seed and fertilizer	1
Delay performance inspection until October 1	1
Make payments to farmers who have not signed farm plan before final date when through no fault of their own	1
Require both owners and operators to sign farm report	1
Accept signatures which are not plain	1
Provide penalty for burning straw	1
Give 100% of payment to tenants where high cash rent charged for diverted acres	1
Eliminate assignments	1
Prepare applications in county office	1
Provide penalty for increasing commercial vegetables on all farms	1
Provide for temporary transfer of allotments from one farm to another with no change in payments except under certain conditions	1
Provide 2% tolerance for overplanting	1
Determine measurements of non depleting acres by subtracting depleting from cropland	1
Give county committees and farmer fieldmen more authority in correcting unintentional overplanting	1

Prevent retirement of less productive land	1
Compute payments and farm plan in county office	1
Make only one check of performance	1
Permit destroying of excess corn if not over 5%	1
Make operator subject to deductions even though he receives his compensation in cash or fixed community payment	1
Use 1936 system of debts and credits for multiple owners	1
Do not permit maintaining a separate non allotment tract in connection with larger unit	1
Inaugurate better system for checking compliance across State lines	1
Give county committee authority to make collections for Treasury Department	1
Honor no assignments except for government loans for feed seed, etc.	1
Estimate size of small irregular fields	1
Make penalties for overplanting less severe	1
Make ACP and parity payments all same time	1

GROUP L -- FIELD ORGANIZATION

Require fieldmen to call at least once a week	12
Reduce expenses of fieldmen and committeemen	1
Require fieldmen to have thorough knowledge of rulings	1
Use part of money spent for fieldmen to employ more efficient people in county office	1
Require State committee should confirm fieldmen rulings in writing	1
Require that instructions by fieldmen be given only when county committee are present	1
Have two or three day State meetings for county committeemen	1

District State and elect member to State committee from each district	1
---	---

GROUP M -- EDUCATION

Give more emphasis to educational program	12
Give more emphasis on education for farm reporters and committee-men	9
Have State committee periodically prepare small AAA newspaper for every farmer in each county	2
Prevent newspapers getting news before county committee	1
Provide monthly information on movement farm products with special emphasis on imports and exports	1
Continue news releases to counties	1
Permit county committee to do educational work when neglected by agricultural agent	1
Give committees clearer instructions and regulations and reasons for same	1
Make available moving pictures which will show effects of erosion and how soil building crops will stop erosion and restore fertility	1
Present facts concerning program to farmers and city people	1
Give committees more theory and less mechanical instructions	1
Furnish more printed material for farm operators to enable them to comply with program	1

GROUP N -- RANGE PROGRAM

Keep wells in range program	2
Make payments for fencing	2
Combine range and soil building allowance and permit earning by practice from either program	2
Revise tree planting standards for range farms	1
Provide winter limited grazing on deferred areas	1

Increase range payments	1
Divide range payments 1/3 for limited grazing: 1/3 deferred acreage: 1/3 for practices, including fences	1
Make no changes in 1939 range program	1
Give rancher opportunity to change intentions if his practices are not approved by fieldman	1
Make payments for extermination of cactus	1
Combine farm and range program	1
Include deferred grazing and wells	1
